

A-DEC 500<sup>®</sup>  
at 12 O'Clock  
& Side

*Preference Collection®  
5580 Treatment Console*

Whether you choose 12 o'clock or side delivery with A-dec 500, you'll have an incredibly flexible treatment room with exceptional instrument positioning for both four- and two-handed operations.

With a round, pivoting worksurface and instrumentation that rotates around the worksurface, you'll have an extensive range of motion and better positioning than any other cabinet-mounted system available today.

# Greater Productivity

Accessory Console with  
A-dec 542 Side Delivery*

*A-dec 500 Chair*

*A-dec 545 Assistant's  
Instrumentation*

*Preference Collection  
5580 Treatment Console  
with A-dec 541 Duo  
Delivery and track-  
mounted monitor*

At A-dec, we believe your choice of instrument delivery should allow you to operate comfortably and efficiently. Which is why we created A-dec 500 side and 12 o'clock delivery solutions—a full-line of cabinet-mounted systems that keep instrumentation out of the direct view of patients, while also providing a means to greater productivity for your entire team.

Exceptional range of motion is the key. In addition to a round, rotating, and height-adjustable worksurface, A-dec 500 assistant's instrumentation features a total of five pivot points to maximize positioning—which means better visibility, less stretching, and reduced motion for your assistant. Meanwhile, A-dec 500 doctor's instrumentation at 12 o'clock moves independently from the worksurface and includes four pivot points to improve positioning. The combined result is a complete and flexible system that offers better ergonomics and efficiency than any other 12 o'clock delivery solution available today.

Inside the A-dec 541 control center, you'll find a unique platform that simplifies the integration of small equipment. There's also ample space, so after incorporating today's most popular devices, you'll still have room for additional future upgrades.

A-dec 500 side and 12 o'clock delivery choices take technology accommodation to a level no other cabinet-mounted system can match. With ample space and creative design, A-dec 500 seamlessly integrates ancillary devices that once required separate boxes, additional wiring, and cumbersome tubing. All of this is now hidden inside, along with a simple and reliable data communication system that allows you to incorporate just what you need today, or easily upgrade in the future. To streamline your system even further, choose the optional deluxe touchpad, and you'll have one streamlined control for chair, dental light, and handpiece functions—as well as other integrated accessories, like electric motors, intra-oral cameras, and scalers.

A convenient track-mount option (now available on most Preference® upper storage modules) makes flat-panel monitor positioning much more flexible.

# Technology Accommodation

The A-dec 541 allows you to integrate all the dynamic instruments you need at 12 o'clock. And with the added flexibility of placing them precisely where you want them, you'll also be able to improve ergonomics and maximize efficiency.

In addition to the many assistant's instrumentation choices, a unique flex-holder allows you to add another position for small equipment, such as a curing light.

# Quality Choices

- Universal mounting hardware allows you to place the **Self-Contained Water Bottle** virtually anywhere in the treatment room. To further simplify waterline maintenance, be sure to consider **A-dec ICX™ Waterline Tablets**.

- The **Deluxe Touchpad** provides a single, streamlined control for chair, dental light, and handpiece functions—as well as a number of other integrated accessories, including **Electric Motors, Intraoral Cameras, Ultrasonic Scalers, and Curing Lights**.

- Worksurface options include a **Full Spectrum of Colors** in laminate or solid surface and a unique **Flex-Holder** that conveniently clamps to any worksurface under 1" (25.4 mm) thick, allowing you to place an additional holder precisely where it's needed.

- **Large or Small Tray Holders** feature full rotation and are available on A-dec 541 and 545 systems.
- Preference 12 o'clock and upper storage modules offer a **Track-Mount** option that enhances flat-panel monitor positioning for intraoral camera viewing, patient recordkeeping, or entertainment.
