

PD Hemostatic Solution

Haemostatic, analgesic & germicidal preparation

Composition

Tannic Acid 25%, Chlorobutanol hemihydrate 1.6%, excipient ad 100%

Properties

Hemostatic is a stable, non irritant solution ready for use. Its coagulating, antiseptic & analgesic properties provide quick haemostasis of post-extractive & post-operative haemorrhages as well as of bleeding of the oral mucosa, while scaling for instance. It also stops a blood flow when it interferes with the dry placement of filling materials such as amalgam or cement.

Indications

- Post-extractive & post-operative haemorrhages
- Local haemorrhages

Packaging

Bottle of 30ml
